

NodeMCU custom build finished

From: NodeMCU custom build (bldr@nodemcu-build.com)

To: kit_barnes@yahoo.com

Date: Monday, July 24, 2023 at 12:35 PM EDT

Your NodeMCU custom build finished successfully. You may now download the firmware:

- float: <https://nodemcu-build.com/builds/nodemcu-release-10-modules-2023-07-24-16-34-08-float.bin>

- integer: <https://nodemcu-build.com/builds/nodemcu-release-10-modules-2023-07-24-16-34-08-integer.bin>

This was built against the release branch and includes the following modules: file, gpio, http, net, node, pwm2, sjson, tmr, uart, wifi.

The files are guaranteed to be available for download for 24h.

I invite you to try my standalone desktop tool to flash firmware binaries: <https://github.com/marcelstoer/nodemcu-pyflasher>

Learn how to flash the firmware: <https://nodemcu.readthedocs.io/en/release/flash/>. If you're upgrading from a previous version you should carefully study the "Upgrading Firmware" instructions on that page.

Please help keep this service alive: <http://nodemcu-build.com/faq.php#support>
